Bangalore, India

EDUCATION

Indian Institute of Technology Madras

Chennai

B.Tech in Aerospace Engineering (with Elective work in Data Science)

May 2022

- Coursework: Data Analytics, Applied Statistics, Probabilistic Systems Analysis & Applied Probability, Linear Algebra, Differential Equations, Complex Variables, Python for Data Science

PROFESSIONAL EXPERIENCE

ITO Health PBC

Dec 2025 - Present

AI Engineering Consultant

- Built policy-driven Medicaid, SNAP, TANF, and child-care eligibility flows from versioned regulations.
- Shipped OpenAI Realtime and Gemini Live voice interviews, with streaming audio, dynamic intake fields, and production safeguards for PII, sessions, CORS, rate limits, and evaluation tests.

Genpact

Bengaluru

Assistant Manager – AI/ML Engineer

Dec 2024 - Apr 2026

- Developed a Mortgage AI-based validation tool which is powered by LLMs and aims to automate validation of Full Mortgage Applications with supporting documents hosted in AWS Lambda.
- Developed a Data Extraction/ Query answering application for credit and loan agreements utilizing Llama3 in a RAG pipeline with deployment in AWS using S3 and Lambda services
- Boosted the capability of Dashboards using Explainable AI techniques which utilizes LLMs to explain the visuals of a dashboard with insights, trends and recommendations along with a Chabot which can be used to create custom plots

IQVIA

Bengaluru

Analyst (Advanced Analytics)

(July 2022 – Dec 2024)

- Implemented Advanced NLP techniques to perform Theme Generation, Sentiment Analysis, text-based Clustering and classification by utilizing Generative AI, Vector Embeddings & Semantic Search to provide actionable insights from large-scale survey feedback data with 20,000+ data points.
- Conducted Robustness Testing on Price Elasticity CI/CD pipelines in Cloudera CDSW along with comparative inflation analysis to evaluate pricing strategies on pharmaceuticals, ensuring strategic pricing decisions were data-driven.
- Developed an AI-ML based Survey Automation tool that utilizes parameter-tuned Boosting ML algorithms which results in a reduction in time taken to reach out and complete the surveys by 8%
- Enhanced various projects such as Market Segmentation, Persona Enrichment to improve target identification & market strategies with modelling and extrapolation techniques

The Prints Company

Remote

Machine Learning Engineer Intern

(Feb 2022 - Mar 2022)

- Deployed Generative Adversarial Network StyleGAN2 to generate designs similar to training data with VGG-16 algorithm
- Developed 5 new web-crawling spiders with Scrapy to scrape high quality design images from popular stock image sites.

SKILLS & CERTIFICATIONS

- **Certifications:** Deep Learning with Tensorflow, Machine Learning, Computer Vision, Generative AI essentials
- **Skills:** Python, EDA, Modelling, NLP, SQL querying, Cloudera CDSW, Pipelines, Vision
- **Libraries:** Pandas, Scikit-Learn, ScraPy, Streamlit, Flask, OpenCV, PySpark, AWS
- **Gen AI skillsets:** LangChain, Gemini, OpenAI, Langgraph, RAG & fine-tuning LLMs, SLMs, Ollama

PERSONAL PROJECTS

LLM Applications

- Developed a generative movie script authoring tool using fine-tuned LLMs (Gemini) for plot exploration and script generation based on user input variables.
- Developed a RAG-based LLM application that performs Topic Modelling & Querying capabilities using LLAMA3 which makes use of Similarity Search with FAISS Index.
- Explored You-Only-Look-Once (YOLO) models to perform Object detection and tracking of CCTV data to generate customer & behavior insights and Generate reports using various LLMs.

LEADERSHIP EXPERIENCE

Saarang (Cultural fest of IIT Madras)

Chennai

Publicity Coordinator

Mar 2018- Mar 2019

- Spearheaded a team of 50 ambassadors across various colleges to publicize Saarang 2019 in Tamil Nadu.
- Amplified the outreach with a 28% increase in footfall in Saarang from 70,000 in 2018 to 90,000 in 2019.
